

Aetria Designer

THE FREEDOM TO DESIGN

Aetria Designer is the dedicated design software for Aetria solutions. It is provided free-of-charge and can be accessed online or installed on any Windows 10 system.

Aetria Designer gives users the freedom to design Aetria solutions based on user requirements and requires technical capabilities and limitations of specific products.

Designs can be created without being connected to a network, making it easy to create, review and approve designs anytime, anywhere.

BUILT-IN MONITOR DATABASE

With a dynamic monitor database built-in, video walls, workstations and screens can be quickly added to your designs.

The database holds specifications on over 500 types of monitors, however, users can easily add additional monitor make/model information to this database.

BILL OF MATERIALS TRACKER

The automated Bill of Materials (BOM) builder keeps track of all the equipment needed to implement your final solution. Export your BOMs as PDFs for recording or sharing purposes.

MULTI-PURPOSE LAYOUTS AND DIAGRAMS

Your screen layout and connection diagram for each design can be exported as static images for inclusion in quotes, tender responses, or documentation.

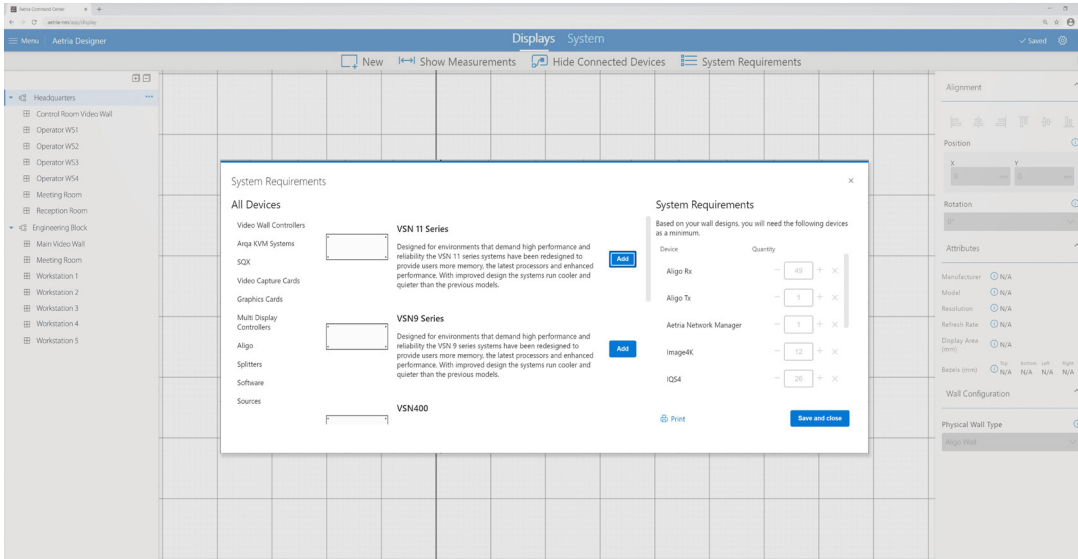

EXPORT PROJECT DESIGNS

Project Designs can be exported as Aetria Designer (.adf) files and imported into Aetria Command Center for implementation.

Engineering the **world's best** visual solutions

**DATA PATH**
EXCELLENCE BY DESIGN

Aetria Designer

Aetria Designer helps users scope out their system requirements. The Aetria solution works seamlessly with Datapath's leading video wall processors, AV over IP solutions and hardware components.

COMPATIBILITY

Online version supported in Chrome, Safari, and Edge.

Download version supported on Windows 10 operating systems.

LANGUAGES

English, French, German, Italian, Spanish.

AVAILABILITY

Visit datapath.co.uk/aetria to access online or download.
